

15" + 20" LCD Monitor

Daylight Viewable – No Shade Necessary

We build custom configurations to your spec. Great for large groups of clients and directors. Very visible in daylight – bright colors, reasonably sharp image that got better in 2007 models. Inputs: TV tuner 181 channels, RGB, S-video, video 1, video 2, RGB, audio, video out, small speakers, 12V older models hard to find. We mount in custom swiveling aluminum yoke by Sam Cherroff www.videoassist.com or our own quick release non tilt mounts, no shade necessary in full sun, wide viewing angle. Menus only - no knobs! Outside visibility is better than glass because they don't reflect the sun, yet are as bright as CRTs. We custom make multipin professional connector boxes mounted on the rear. 15" Monitor Sharp LC-15S4U-S1 was 12V DC, LC-15SH7U; or Sharp 20" LC-20S1US with 12V, S2, S3, also has 12 V, 4US has no 12V.
