

# 15" + 20" LCD Monitor

**Daylight Viewable – No Shade Necessary**

We build custom configurations to your spec. Great for large groups of clients and directors. More visible in daylight than CRTs. 12V 3x4 models are hard to find. No shade necessary in full sun. Outside visibility is better than glass because they don't reflect the sun, yet are as bright as CRTs. We custom make multipin professional connector boxes mounted on the rear. We do not make custom shades out of very rigid black Tri-ply, but we will sell you the Tri-Ply. 15" Monitor Sharp LC-15S4U-S1 no 12V DC?, Aquos LC-15S1U-S yes 12 V 14.3 x 12.8 x 2.3", LC-15SH7U; or Sharp 20" LC-20S1US with 12V, S2, S3, also has 12 V.
